

Following our discussion at our last forestry meeting, Steve Vittum has used his expertise to facilitate a mini "Fire Camp" of approximately 4 hours to meet our specific interests and needs. Kent Maxwell, who provides the full scale Fire Camp, will instruct us with the help of Mark Thomas. This will be held at the Sangre De Cristo Meeting room on May 2nd at 9i:30 and be followed by a walk-about up here in Game Trail to look at the things we will be discussing. I encourage all forestry folks to do their best to attend. Also other interested Game Trail residents are encouraged to attend as room permits. Spread the word. RSVP to me.

The following day, also at 9:30 Damon Lange and Megan will teach us what to look for and how to do a meaningful lot evaluation for fire, (as was proposed at our last meeting). The location to meet is yet to be determined, but will be somewhere up here on a Gametrail lot. This tool will help us to help our neighbors as they become more interested and concerned with fire mitigation, and help us to evaluate which lots might take priority with our proposed assistance to lot owners. I am hopeful that together these two sessions will give all members of our committee a common base of knowledge as we attempt to educate/help our neighbors.

Thanks to Steve for this idea and for making the appropriate contacts to make this come together. Let's make an effort to take advantage of this great opportunity. Judy
